Zahlungsart:	
Angebots Datum:	30.03.2008

Model: FY806 characteristic: Doubled cooling System tub for the mixture equipped with own specially cooling system. The agitating system receives the ice mass in best quality. Our ice cream machines use excellent polishingstainless steel 304 with 1.2 strength. Park program: Ice-mix into the machine leave over night, which works machine like a normal refrigerator. Specially cooling system compressor mains voltage: 220V50Hz/110V60Hz/220V60Hz cooling agent: R404 and R134a compressor: 1,8

KW of mixing capacity alerting (indicator lights show on if the ice cream mixture, lower than will adjusted in accordance with-eat. This alarm device reminds the user the ice cream mixture to refill around a continuous and smooth ice sales make possible and to guaranteeing. Excellent oscillation damping of all parts with stable swinging rubber (a very low noise) production announcement (flashing diodes show rising the current degree of hardness of the ice-cream up to the adjusted value) insures ideals ventilation (the interior, even under hot temperature conditions, avoids that which cooling is maintained, so that ice production is not affected. Cock with the special Design unloading, avoids dirt, comfortably for the Portionierung, and it seals the cylinder independently without each leakage off. Hardsoftly Tronik system ice consistency adjustable, in the interval of stage the 1, to 8 adjustable (a fakultative adjustment for the user, for an adjustable taste and degree of hardness makes available) with tire pumps by less ice mixture consumption is saved on to cost! Fuellmenge:2x4L for 2 Sorten+Mix/3 Zafhaene with cost counter, screen and Waffelhalter max. output per hour 18-20kg/hr air cooling refrigerant: (FCKW freely) weight: 145Kg B/T/H 750x546x1328mm
